## Helpful hints and tips!

For most of these St. Patrick's Day challenge card activities, we have a corresponding post. Otherwise, they can be left up to your kids creativity and curiosity!

Helpful supplies to have on hand are vinegar, baking soda, Elmer's clear washable school glue, food coloring, glitter, liquid starch, popsicle sticks, rubber bands, pennies, fake gold party coins and mini black pots, Skittles candy, white carnations, old CD or prism, eyedropper, and recycling materials from around the house!

This may seem like quite a few things but you probably have most of the items on hand. I will also link to products we have used. Or you can pick just a few challenges to try that fit your needs!

A must try challenge card is the Leprechaun Trap building activity. It's a classic St. Patrick's Day activity for kids and families. We have a great post on all the details of building a trap as well as a printable design sheet.

Have fun designing, experimenting, building, and exploring with St. Patrick's Day!
