Design Process for Kids
design | build | test | improve

Ask!
What's the problem you want to solve?

Think!
Come up with a possible solution that might work.

Design!
Draw your plan or diagram. List and gather supplies.

Build!
Put your plan into action and build your design!

Test!
Test your solution. Is it a success or does it need improvement

Improve!
What can you do to make your design better? Make changes and test again!
