

FAMOUS SCIENTISTS

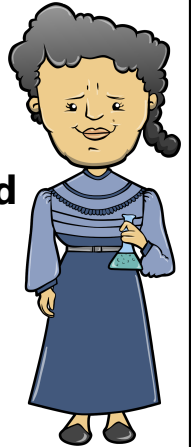

THOMAS EDISON

An inventor who created many useful things, including a practical electric light bulb.

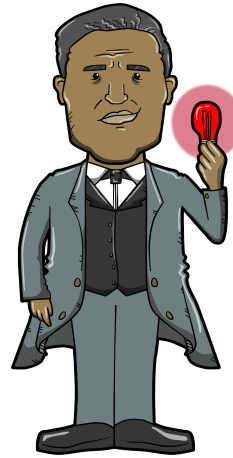

MARIE CURIE

A scientist who studied radioactivity and discovered new elements that helped scientists understand energy inside atoms.

GALILEO

A scientist who used a telescope to study space and helped show that the Earth moves around the Sun.

GARRETT MORGAN

An inventor who created an early traffic signal and a safety hood that helped protect firefighters from smoke.

ADA BYRON LOVELACE

A mathematician who wrote the first ideas for computer programs long before modern computers existed.

ALEXANDER GRAHAM BELL

An inventor who helped create the telephone so people could talk to each other from far away.

MARGARET HAMILTON

A computer scientist who wrote the software that helped astronauts land on the Moon.

NEIL DEGRASSE TYSON

An astrophysicist who studies space and teaches people about the universe.

LOUIS PASTEUR

A scientist who discovered that tiny germs cause disease and helped create vaccines to keep people healthy.

AMELIA EARHART

A pilot who became famous for flying long distances and inspiring women to become aviators.
